Denis Coelho

Denis Coelho moved to Sweden from Portugal in 2019 to take on the role of assistant professor at Jönköping University's School of Engineering, focusing on Human Factors and Ergonomics in both teaching and research activities.

He holds a Master's degree in Management of Production and earned his Mechanical Engineering doctoral degree in 2002 focusing on Human Factors and Ergonomics in Engineering Design. His research spans working conditions from the ergonomic and psychosocial perspective, as well as the design, usability and electromyographic study of tangible interfaces. He started and edits the International Journal of Human Factors and Ergonomics.

2026 Annual Meeting Keynote Speaker

Webinar Camille Peres

Webinar Wendy Ro

With core competencies in work environment analysis and erg
development research, I have a keen interest in interactions be
and technology that reside in the physical, cognitive, emotiona
and even cultural levels. This is supported by the broad HFE to
enables identifying and solving problems, from design seeds (I
about what would work) to ergonomic product development a...
methods.
